Portugal

For the past two years, I've worked as a full-stack JavaScript developer and also served as the tech lead on one of the team's squads. In this role, I helped build a product focused on retention. This involved leading two developers and collaborating with a Product Manager and a Product Designer to generate ideas for new features based on user research while ensuring technical feasibility.

I recently relocated from London to Portugal, and for my next role, I'm looking for a fully remote role where I would ideally have a similar position both writing code and managing or mentoring people, as I believe those are my strengths.

## Work Experience

### Full Stack Developer at GetAgent

London, United Kingdom

React · Koa · Figma · MySQL · Next.js · Git · Asana · CustomerIO

March 2021 to April 2023

- Maintained and improved the product as a Full Stack Developer.
- Led a team of two developers in building a new product, collaborating with the Product Manager and Product Designer to generate ideas for new features based on user research, while ensuring technical feasibility.
- Made decisions on the architecture of new tasks.
- Performed final technical QA of teamwork and eventual release.
- Collaborated with other teams in the business (CRM, marketing, SEO, etc.).
- Provided mentorship and management to trainees and junior developers in order to improve their performance and productivity, as well as to assist with their career progression.

### Product Lead for Ethics Monitor at Haplo

London, United Kingdom

JavaScript · Trello · Git

May 2019 to January 2021

- Led the end-to-end development process for custom applications, from authentication setup to successful deployment, ensuring client satisfaction.
- Provided support to existing clients.
- Mentored a team member, resulting in improved skills and contributions to the product.
- Actively participated in weekly discussions on team challenges.

### Full Stack Developer at HYP

Coimbra, Portugal

jQuery · PostgreSQL · Git · Ruby on Rails · JavaScript

September 2018 to January 2019

- Collaborated with a team of developers and designers to create and launch BabyLoop, a successful platform for buying and selling used baby products.
- Implemented various website components, including search and product pages, for a seamless user experience.

- Built the payments process and invoice generation using SIBS API and InvoiceExpress API respectively.
- Configured email jobs within Rails' Active Jobs to streamline communication processes.
- Utilised Ruby on Rails API to develop an API consumed by the mobile app.
- Developed an admin back office using *rails\_admin* to efficiently manage platform content.

ONESOURCE

### Full Stack Developer at OneSource

Coimbra, Portugal

HTML · jQuery · Ruby · Git · JavaScript · CSS

March 2017 to August 2018

- Developed a SketchUp extension in collaboration with civil engineers from the University of Coimbra to optimize building structures, using SketchUp's Ruby API.
- Acted as the lead developer on the project and managed meetings with clients while reviewing and merging code from the civil engineering team for seamless integration.
- Led the development of the app interface as well as backend functionality, including calculations, database interaction, and API calls.

## Education History

### Bachelor's Degree, Informatics Engineering

University of Coimbra

Year of Graduation: 2017

## More about me

### Interests

During my free time, I enjoy reading books, playing on my Nintendo Switch, and meeting friends to play board games.

### I want to work for a company that...

values diversity and encourages healthy discussions on how things are going and what can be improved.

### At work I'm best at...

building relationships with colleagues. I take pride in being the go-to person when someone has a question, which has led to me naturally progressing toward mentorship and leadership roles.
